PROFESSIONAL SUMMARY

Principal Product Leader specializing in AI-powered search, retrieval, personalization, and intelligent enterprise applications for large-scale e-commerce ecosystems, including Catalog, Purchasing, Invoicing, and Payments. Currently operating search systems at SAP serving 50M+ queries/day across 15B+ indexed documents with 99.99% uptime.

Deep hands-on expertise across the AI stack, including **Agentic RAG frameworks, LLMs, semantic embeddings, vector search, and ML re-ranking**. Has a proven track record of shipping 0-to-1 and 1-to-N AI-first products that drive measurable business outcomes. Known for bridging product vision with engineering execution across global cross-functional teams.

AREAS OF EXPERTISE

- LLM-driven intelligence, Conversational AI, and Personalized Recommendations
- AI Search, Semantic Discovery and Retrieval Systems using RAG
- Agentic AI shopping copilot
- Hands-on Prototyping and Technical Architecture Collaboration
- A/B Testing & Experimentation
- Product Strategy, Vision & Roadmap Planning
- Customer-Facing B2B SaaS Procurement/ eCommerce AI Product Launches
- Partnering with Global Customers for Innovation
- Cross-Functional Leadership Across Engineering, Design, and GTM
- Executive Stakeholder Management

PROFESSIONAL EXPERIENCE

SAP | Principal Product Manager - AI Search, Discovery & Intelligent Applications | Jan 2022 – Present

Leading AI search product strategy across SAP's Source-to-Pay suite, partnering with enterprise customers globally and co-innovating with LLM providers like Google and Perplexity.

- Architected and launched global enterprise RAG framework, 0-to-1 using semantic search, NER, vector storage, embeddings, ML re-ranking, LLMs, and SLMs, improving procurement discoverability across Marketplace, Catalog, Sourcing, Buying, Invoicing, and Supplier Management workflows.
- Spearheaded **LLM-based Catalog data enrichment and personalized recommendation systems**, delivering a step-change in user engagement and session depth.
- Led the 0-to-1 build of an **Agentic AI shopping copilot** that autonomously identifies better products, prices, and alternatives by combining real-time data retrieval with LLM-driven decision-making, built on a LangChain multi-agent architecture.
- Evaluated and improved RAG pipeline performance using RAGAS (RAGASsessment) by measuring faithfulness (hallucination), context precision/recall, and answer relevancy against ground truth to optimize retrieval and response quality.
- Drove Vector Search, ML training and serving pipeline redesign that reduced latency from 2s to 500ms, improving search relevance by 60% (NDCG), user experience and system reliability.
- Led A/B experiments on production traffic that reduced defects by ~50% while validating feature adoption and measuring user impact across enterprise accounts.
- Partnered with Google and Perplexity to evaluate LLM-based relevance, ranking quality, and generative augmentation for next-generation search and discovery.
- Led cross-functional alignment across engineering, data science, design, UX, and customer success (teams of 30+ across 3 regions) to deliver end-to-end intelligent search experiences.

SAP | Senior Manager of Product - AI Search, Discovery & Intelligent Applications | Mar 2014 – Dec 2021

Built and scaled the enterprise AI search platform from the ground up to serve 50M+ queries/day; led a cross functional team of 6 PMs and 40+ engineers across Bangalore, Palo Alto, and Waldorf.

- Built and owned the semantic search product serving 50M+ queries/day across 15B+ indexed documents, maintaining 99.99% uptime and sub-300ms latency at peak load.
- **Launched ML-powered semantic search** delivering 82% (NDCG) relevance improvement over the legacy system through query optimization, intent modeling, and personalization.
- Led migration from private to public cloud, reducing infrastructure costs by ~30% while improving scalability and fault tolerance.
- Drove platform standardization across Sourcing, Procurement, and Supplier workflows, reducing system redundancy by 67% and accelerating time-to-market for new features.
- Defined AI Search North Star and multi-year roadmap, aligning engineering, design, and GTM teams through capacity planning, opportunity mapping, and customer co-design sessions.

Ariba Inc. | Automation Engineer, Team Lead, Manager | September 2001 - February 2014

Progressed from individual contributor to engineering manager overseeing Development, QA & Automation for Buyer, Invoicing, Catalog, and Contracts products.

- Built large-scale automation and certification frameworks across product suites, reducing regression cycle time by 50% and accelerating release velocity.
- Led on-premises to private cloud infrastructure migration for customers, establishing the cloud-first delivery model that became standard across the organization.
- Designed multi-user functional and concurrent testing suites that shifted defect detection earlier in the development lifecycle, improving overall product quality.

SKILLS

- **AI & ML:** LLMs, Gen AI, SLMs, Agentic, RAG frameworks, semantic & vector search, embeddings, NER, personalization, MLOps, prompt engineering, model evaluation & serving
- **Search & Analytics:** Hybrid search, relevance tuning, NDCG, MRR, clickstream analytics, A/B testing, behavioral analytics, Solr, vector databases, query & ingestion pipelines
- **Cloud & Platform:** Multi-tenant SaaS, GCP, AWS (Lambda, EC2, S3, Bedrock, OpenSearch), Azure, microservices, distributed systems, CI/CD, observability, Python, Java, SQL, stream processing, API/SDK platform PM
- **Product Leadership:** 0-to-1 & 1-to-N product launches, roadmap planning, OKRs, go-to-market strategy, pricing & packaging, cross-functional leadership, executive communication, build vs. buy analysis
- **Domain:** B2B SaaS, enterprise procurement, Source-to-Pay, e-commerce, FedRAMP
- **Tools:** Jira, Aha!, Figma, Tableau, Splunk, ChatGPT, Gemini, Perplexity, GitHub, Claude code, OpenAI Codex, Github Copilot

EDUCATION

- Master of Science (Applied Electronics), Gulbarga University
- Bachelor of Science (Computer Science), Gulbarga University
